CASTLE WOLFENSTEIN™

World War II is raging across Europe, and Castle Wolfenstein has been occupied by the Nazis and converted into their HQ.

You have just been captured behind enemy lines and await interrogation and torture by the dreaded SS in the dungeons of Castle Wolfenstein. A dying cellmate bequeaths you your only hope - a gun and ten bullets.

Your Mission:

Find the war plans and escape from Castle Wolfenstein **ALIVE!**

Starting the game:

Boot the program disk. When the title page appears press START to display the selection page and your present rank.

From the selection page:

Press 0, 1 or 2 to select the type of controls you will be using and start the game.

Press CTRL-N to generate a new castle. After pressing CTRL-N, the screen will display the options available. To generate a new castle and retain your present rank, press SELECT. To generate a new castle and reset your rank to Private, press OPTION. To exit to the selection page without generating a new castle, press START.

Playing the game:

Your escape from Castle Wolfenstein starts in the lowest level of the castle. You will always start in the same castle until you escape from it or generate a new one and you will always start with a gun and ten bullets. The guards won't see you until you make a move, then watch out!

Each room in the castle has at least one doorway that leads to an adjoining room or a stairway that leads to another level of the castle.

As you roam from room to room, trying to find the chest that contains the war plans and the doorway to freedom, you will have to shoot your way past guards and SS stormtroopers. You can replenish your supply of bullets and acquire other supplies by searching guards and opening supply chests. If you're caught with the war plans they are lost and you should start a new castle.

If you search a dead or surrendered guard and find some items that you need, they will automatically be transferred to your supply. However, bullets will be transferred only if the guard's clip contains more bullets than your clip.

You will need to move quickly, so you will be limited to a maximum of 10 bullets, 3 grenades, keys, a bulletproof vest, a uniform and the war plans for Operation Rheingold.
